Emergency Addendum:

Date: Wednesday, April 24, 2024

Highly Pathogenic Avian Influenza (HPAI) in cattle has been added to the Wyoming Livestock Board Reportable Disease List due to a Federal Order on reporting of this disease.

HPAI in cattle is an emerging infectious disease with rare zoonotic potential.

Report suspicious and/or confirmed HPAI detections in cattle to the Wyoming State Veterinarian immediately, at (307) 840-1389 or lsbforms-applications@wyo.gov.

Signature _____ Date: April 25, 2024

By state statute (WS 11-19-102) any person or government entity who knows or suspects that there is a contagious or infectious disease among animals under their jurisdiction or any veterinarian who knows of or suspects a reportable disease must report the same to the State Veterinarian's office within 24 hours. All information collected in response to the reportable disease list shall remain confidential. To report a disease call: (307) 777-7515.

***** It is critical that veterinarians report positive test results to the Wyoming State Veterinarian's Office, especially if the Wyoming State Veterinary Laboratory was not used for testing. *****

Recognize Potential Signs of Foreign Animal Diseases:

- Sudden, unexplained death loss in a herd or flock
- Severe illness affecting a high percentage of animals
- Blistering around an animal's mouth, nose, teats, or hooves
- Unusual ticks or maggots
- Staggering, falling, or central nervous system disorder

Many Vesicular Diseases endemic in the USA are clinically indistinguishable from many Foreign Animal Diseases including Foot & Mouth Disease. When examining animals, it is imperative that veterinarians consider Foreign Animal Diseases when vesicular lesions are present and that veterinarians notify the State Veterinarian.

General Suspicious Signs of Bioterror Weapon Activity:

- Increased morbidity or mortality
- Disease in a species not normally manifesting the disease
- Disease at unusual time of the year
- Disease in areas not normally found
- Lack of response to the usual treatment

Emergency Contact Information:

NOTES

“Category A” Reportable Diseases

Foreign animal diseases are listed in the Wyoming Livestock Board reportable disease list under Category A. Any Foreign Animal Disease, whether listed below or not, is considered reportable to the Wyoming State Veterinarian.

Additionally, several significant domestic diseases are also listed in the Category A List. Category A list diseases are diseases of concern to both the Wyoming Livestock Board and USDA APHIS, and will be responded to jointly between the two agencies.

Category A Disease List

Foreign Animal Diseases

African Horse Sickness
African Swine Fever
Classical Swine Fever
Contagious Bovine Pleuropneumonia
Contagious Caprine Pleuropneumonia
Dourine
Foot and Mouth Disease
Glanders
Heartwater
Leishmaniasis
Lumpy Skin Disease
Nairobi Sheep Disease
Peste Des Petits Ruminants
Rift Valley Fever
Rinderpest
Screwworm, New and Old World
Sheep Pox/Goat Pox
Surra
Swine Vesicular Disease
Theileriasis
Trypanosomiasis
Vesicular Stomatitis

Domestic Animal Diseases

Avian Influenza High Pathogenic
Babesiosis
Bovine Spongiform Encephalopathy
Brucellosis
 Brucella abortus
 Brucella melitensis
 Brucella suis
Contagious Equine Metritis
Equine Infectious Anemia
Fowl Cholera
Malignant Catarrhal Fever
Marek’s Disease
Myxomatosis
(Exotic) Newcastle’s Disease
Pseudorabies
Rabbit Calicivirus
Scabies
Scrapie
Transmissible Spongiform
 Encephalopathy
Tuberculosis (TB)
 Human TB
 Cattle TB

WLSB Response Protocol for "Category A Diseases"

1. **Call** the Wyoming State Veterinarian's Office immediately.
 2. Complete a WLSB Reportable Disease Notification Form and mail, fax, or email to the State Veterinarian's Office as soon as possible.
- **Upon a report from a veterinarian or laboratory of a SUSPECTED "Category A" Reportable Disease, the State Veterinarian will:**
 1. Coordinate with the USDA APHIS AVIC to prepare for response if the diagnosis is confirmed and to determine which agency will be the lead investigator, and begin Incident Command Procedures.
 - The Wyoming State Veterinarian will assume Incident Command.
 - If the disease is an FAD, APHIS will be the lead agency.
 2. Contact the owner of affected livestock and advise them that an initial investigation will be forthcoming. The State Veterinarian will also advise owner of likely response actions if the disease is confirmed.
 3. If the WLSB is the lead agency, assign a WLSB Staff Veterinarian to complete the WLSB Reportable Disease Case Investigation Report (RDCIP) items 1-20.
 - A. **The WLSB Staff Veterinarian will:** (in coordination with APHIS personnel)
 1. Give a quarantine order to the animal owner to prevent movement of any animals from the premises until diagnosis is confirmed.
 2. In the case of a disease of human health significance, inform the owner about personal exposure and notify the Wyoming Department of Health.
 3. Collect necessary diagnostic samples and submit to appropriate laboratory.
 4. Advise no movement of any carcasses until diagnosis is confirmed.
 5. Advise about proper carcass disposal.
 6. Advise owner about biosecurity of site and proper disinfection and supply personal protective equipment at the Staff Veterinarian's discretion.
 - **If Diagnosis is negative for "Category A" (and is not a reportable disease) the WLSB Staff Veterinarian will:**
 1. Confirm with State Veterinarian and AVIC.
 2. Notify reporting veterinarian.
 3. Notify owner and release quarantine.
 4. Close case and notify the State Veterinarian.

- **Upon Report of a CONFIRMED DIAGNOSIS of a " Category A" Disease**
 - A. The State Veterinarian will:
 1. Begin Incident Command Procedures using Unified Command.
 2. Issue quarantine of all animals on affected premise.
 3. Notify the following:
 - a) Assistant State Veterinarian and WLSB Staff Veterinarian(s)
 - b) Animal owner
 - c) WLSB members and all staff
 - d) Attending/reporting veterinarian
 - e) AVIC
 - f) Governor's office in person or by phone
 - g) Wyoming Department of Agriculture Director
 - h) Wyoming State Veterinary Laboratory Director
 - i) Other state agencies as appropriate per the disease
 - a. Office of Homeland Security
 - b. Department of Health (zoonosis)
 - j) Livestock industry groups as appropriate per the disease
 - k) Licensed veterinarians
 - l) Producers – on a need to know basis
 4. State Veterinarian will maintain confidentiality of information pertaining to the case as appropriate. Information will be disseminated only on a need to know basis.
 5. State Veterinarian will convene a regulatory decision group composed of the State veterinarian, Assistant State Veterinarian, WLSB Director, APHIS AVIC, and APHIS epidemiologist to coordinate the action plan and response protocol.
 - In cases involving a USDA Program Disease and/or a WLSB Rules disease, the USDA/APHIS Uniform Methods and Rules and the WLSB Rules will be followed in the regulatory handling of the case.
 6. State Veterinarian will direct a Staff Veterinarian to:
 - a) Complete the RDCIR and fax or email copies to the State Veterinarian as information is completed.
 - b) Advise owner that burning of the carcass(es) is the disposal method preferred. The Wyoming Livestock Board has the only burner in the state.
 - c) Advise owner that burning of any bedding that may be contaminated by the carcass and body fluids is also necessary.
 - d) Advise owner to clean and disinfect all equipment, clothing, and utensils used and associated with the carcass(es).
 - e) In cases of zoonotic disease, recommend that personnel obtain medical advice from their physician.
 - f) Keep State Veterinarian immediately updated on all issues.
 - g) WLSB Staff Veterinarian or other designees will contact all adjacent livestock owners and notify them of the case location and all implications (**depending on the disease and only at the State Veterinarian's direction**).
 - h) Notify all slaughter facilities in the area that the disease has been diagnosed therefore use caution with all slaughter requests. **This will depend on the disease & species affected and will be done at direction of the State Veterinarian.**

- i) WLSB Staff Veterinarian shall discuss disease signs, symptoms, and precautions if any dead animals, regardless of mammalian species, are found on the premises. Premise owners' veterinarian should be contacted and a diagnosis obtained. Personnel, equipment, and clothing exposure cautions need to be assessed.
 - j) WLSB Staff Veterinarian shall evaluate any possible animal exposures, feeds and ingredients fed, water sources and waterways, excavations and dirt delivery, and any vehicle traffic containing live or dead animals on the premises.
 - k) WLSB Staff Veterinarian or other designee should contact all veterinary practitioners in the surrounding area to inform them of the case and all implications.
 - l) WLSB Staff Veterinarian or other designee will maintain contact with the quarantined premises operator and/or his veterinarian and immediately report any additional deaths or actions to the State Veterinarian.
 - m) WLSB Staff Veterinarian or designee will compile records of people contacted, issues discussed, and information relating to this case and submit a case report along with the copy of the Disease Investigation Report to the State Veterinarian upon release of quarantine.
7. State Veterinarian and the regulatory decision group in the ICS will determine the need for herd or flock testing, depopulation, and surveillance on the index premises and on adjacent or contact herds or flocks, which will include quarantine and quarantine release protocol.
 8. State Veterinarian will conduct an epidemiologic investigation of the disease incident.
 9. State Veterinarian will provide for producer, industry, and public education on the disease and the appropriate response protocol through meetings, press releases, or other appropriate methods. Public information notices should be used to help keep people calm/prevent panic.
 10. State Veterinarian will maintain communication with animal owner(s) to keep them informed of regulatory action plan and provide appropriate assistance and cooperation through quarantine release.
 - a) Quarantine release date will be determined by State Veterinarian and AVIC depending on conditions to be met for specific disease.
 11. State Veterinarian will prepare a final report on the case and present it to the Director of WLSB and to the Governor.

“Category B” Reportable Diseases

Category B diseases are domestic diseases of importance primarily to the Wyoming Livestock Board, and in some cases, to USDA APHIS. These diseases can be a significant threat to the livestock industry if not contained. A quarantine and regulatory action may be taken on “Category B” diseases depending on the disease severity and magnitude of an outbreak.

Category B Disease List

Anaplasmosis
Anthrax
Avian Chlamydiosis
Avian Influenza Low Pathogenic
Bluetongue
Equine Herpes Virus
Equine Viral Arteritis
Foot Rot, Virulent (ovine)
Paratuberculosis
Q Fever
Rabies
Toxoplasmosis
Trichomoniasis
Tuberculosis – Bird TB
Tularemia

WLSB Response Protocol for "Category B Diseases"

1. **Call** Wyoming State Veterinarian's Office immediately.
2. Complete a WLSB Reportable Disease Notification Form and mail, fax, or email to State Veterinarian's Office as soon as possible.
- **Upon a report from a veterinarian or laboratory of a SUSPECTED "Category B" Reportable Disease, the State Veterinarian will:**
 1. Advise the USDA APHIS AVIC of the disease report.
 - APHIS may play a role in response to some "Category B" Diseases depending on the disease, the severity, magnitude, and possibility of intentional introduction.
 2. If the suspected disease is a zoonotic disease, notify the State Public Health Veterinarian.
 3. Contact the owner of affected livestock and advise them that an initial investigation will be forthcoming. The State Veterinarian will also advise owner of likely response actions if the disease is confirmed.
 4. Anthrax, Trichomoniasis, and Low Pathogenic Avian Influenza are handled according to protocols written specifically for these diseases.
 5. Assign a WLSB Staff Veterinarian to complete the WLSB Reportable Disease Case Investigation Report (RDCIP) items 1-20. **(In cases involving domestic animals)**
- A. **The WLSB Staff Veterinarian will:**
 1. Advise the animal owner to quarantine any animals from the premises until diagnosis confirmed.
 2. In the case of a disease of human health significance, inform the owner about personal exposure and refer them to Wyoming Department of Health.
 3. Advise about proper carcass movement and disposal.
 4. Advise owner about biosecurity of site and proper disinfection.
- **If Diagnosis is negative for "Category B" (and is not another reportable disease) the WLSB Staff Veterinarian will:**
 1. Confirm with Cheyenne office.
 2. Notify reporting veterinarian.
 3. Notify owner.
 4. Release Quarantine.
 5. Close the case and notify the State Veterinarian.

• **Upon Report of a CONFIRMED DIAGNOSIS of a " Category B" Disease the State Veterinarian:**

1. May issue quarantine of all animals on affected premise. **This will depend on the disease, severity, and magnitude of the outbreak.**
 - b) Quarantine release date will be determined by State Veterinarian depending on conditions to be met for specific disease.
2. May notify the following: (Depending on disease severity and magnitude of the outbreak.)
 - a) Assistant State Veterinarian and WLSB Staff Veterinarians
 - b) Animal owner
 - c) WLSB members and all staff
 - d) Attending/reporting veterinarian
 - e) AVIC
 - f) Governor's office
 - g) Wyoming Department of Agriculture Director
 - h) Wyoming State Veterinary Laboratory Director
 - i) Other state agencies as appropriate per the disease
 - j) Livestock industry groups as appropriate per the disease
 - k) Licensed veterinarians
 - l) Producers – on a need to know basis
3. State Veterinarian will maintain confidentiality of information pertaining to the case as appropriate. Information will be disseminated only on a need to know basis.
4. State Veterinarian will convene a regulatory decision group (ICS) composed of the State Veterinarian, Assistant State Veterinarian, and WLSB Director to coordinate the action plan and response protocol and set up Incident Command Procedures.
5. State Veterinarian will direct a Staff Veterinarian to:
 - a) Complete the RDCIR and fax copies to the State Veterinarian as information is completed.
 - b) Advise owner of the disposal method preferred for carcasses.
 - c) Advise owner to burning any bedding that may be contaminated by a carcass or body fluids.
 - d) Advise owner to clean and disinfect all equipment, clothing, and utensils used and associated with the case.
 - e) In cases of zoonotic disease recommend that personnel obtain medical advice from their physician.
 - f) Keep State Veterinarian immediately updated on all issues.
 - g) WLSB Staff Veterinarian will contact all adjacent livestock owners and notify them of the case location and all implications. **(depending on the disease and only at the State Veterinarian's direction)**
 - h) Notify all slaughter facilities in the area that the disease has been diagnosed; therefore, use caution with all slaughter requests. **This will depend on the disease & species affected. Will be done at direction of the State Veterinarian.**
 - i) WLSB Staff Veterinarian(s) shall discuss with producers disease signs, symptoms, and precautions if any dead animals, regardless of mammalian species, are found on their premises. The producers' veterinarian should be contacted and informed of the investigation. Personnel, equipment, and clothing exposure cautions need to be assessed.
 - j) WLSB Staff Veterinarian should contact all local veterinary practitioners to inform them of the case and all implications.

- k) WLSB Staff Veterinarian will compile records of people contacted, issues discussed, and information relating to this case and submit a case report along with the copy of the Disease Investigation Report to the State Veterinarian upon release of quarantine.
 - l) WLSB Staff Veterinarian will conduct an epidemiologic investigation of the disease incident.
6. State Veterinarian and the regulatory decision group will determine the need for herd or flock testing, depopulation, and surveillance on the index premises and on adjacent or contact herds or flocks, which will include quarantine and quarantine release protocol.
 7. State Veterinarian will provide for producer, industry, and public education on the disease and the appropriate response protocol through meetings, press releases, or other appropriate methods.
 8. State Veterinarian will maintain communication with animal owner(s) to keep them informed of regulatory action plan and provide appropriate assistance and cooperation through quarantine release.
 9. Ensure all quarantines are released.
 10. State Veterinarian will prepare a final report on the case.

Category C Disease List

“Category C” Reportable Diseases are ALL zoonotic diseases. There are also potentially zoonotic diseases listed in Category A, B, and D, and public health will be notified on every zoonotic disease case reported to the Wyoming State Veterinarian. All zoonotic diseases will be handled as per “Category C” response protocol in addition to protocol from another category if so listed. Many of the diseases listed in “Category C” will not likely require a quarantine or regulatory action, but must be reported due to their public health significance.

Most cases of “Category C” diseases will be handled by a local veterinary practitioner and the livestock/ animal owner.

In cases where human illness is reported relative to the disease in animals, the Wyoming Public Health Veterinarian will be involved in the regulatory response. Producer, industry, and public education/information may be needed in unique cases depending on the severity and magnitude of the outbreak.

Brucella canis
Campylobacteriosis
Contagious Ecthyma
Cysticercosis
Dermatophilosis
Dermatophytosis
Echinococcosis
Giardiasis
Histoplasmosis
Leptospirosis
Listeriosis
Lyme’s Disease
Plague
Rocky Mountain Spotted Fever
Salmonella Infection
Trichinellosis
West Nile Virus

WLSB Response Protocol for "Category C" Disease

- **Upon notification of a confirmed diagnosis of a "Category C" Reportable Disease, the State Veterinarian or designee will:**
 1. Complete a WLSB Reportable Disease Notification Form and mail, e-mail, or fax it to the Wyoming Livestock Board within 30 days.
 2. Advise the Wyoming Public Health Veterinarian of the disease report.
 3. Determine the severity and magnitude of the case in consultation with the reporting veterinarian and determine whether regulatory action from the WLSB is necessary.
 4. If not necessary, the State Veterinarian will advise the reporting veterinarian on how to proceed with the case.
 5. If WLSB regulatory action is prudent and necessary, the State Veterinarian will direct a WLSB Staff Veterinarian to coordinate with the livestock owner and the reporting veterinarian to assess the case situation and report back to the State Veterinarian.
 6. If deemed necessary by the investigating WLSB Staff Veterinarian, a quarantine of animals will be issued by the State Veterinarian and response protocol will be developed cooperatively between State Veterinarian, WLSB Staff Veterinarian, reporting veterinarian, and animal owner.
 7. The State Veterinarian will direct a WLSB Staff Veterinarian to complete the WLSB Reportable Disease Case Investigation Report. (RDCIP)
 8. If there is human illness associated with the disease in animals, the State Veterinarian and WLSB Staff Veterinarian(s) will coordinate response with the Wyoming Public Health Veterinarian.
 9. If deemed necessary by the investigating WLSB Staff Veterinarian, the State Veterinarian, and the Public Health Veterinarian, education and information efforts will be undertaken for producer, industry, and public.

Category D Disease List

The diseases in category D are either enzootic in Wyoming or are not expected to cause significant impact to our livestock industries. However, the diseases listed do need to be monitored for their prevalence and severity, and in unique cases may require a quarantine.

Most cases of "Category D" diseases will be handled by a local veterinary practitioner and the livestock/ animal owner. Producer, industry, and public education/information may be needed in unique cases depending on the severity and magnitude of the outbreak.

Atrophic Rhinitis
Avian Encephalomyelitis
Avian Infectious Laryngotracheitis
Avian Infectious Bronchitis
Avian Mycoplasmosis
Bovine Leukosis
Bovine Genital Campylobacteriosis
Brucella ovis
Caprine Arthritis Encephalitis
Contagious Agalactia
Duck Viral Enteritis
Duck Viral Hepatitis
Enzootic Abortion of Ewes
Equine Encephalitis
Equine Influenza
Hemorrhagic Septicemia
Infectious Bovine Rhinotracheitis
Infectious Bursal Disease
Infectious Pustular Vulvovaginitis
Maedi Visna
Ovine Pulmonary Adenomatosis
Porcine Reproductive and Respiratory Syndrome
Potomac Horse Fever
Transmissible Gastroenteritis

WLSB Response Protocol for "Category D" Disease

- **Upon notification of a confirmed diagnosis of a "Category D" Reportable Disease, the State Veterinarian or designee will:**
 1. Complete a WLSB Reportable Disease Notification Form and mail, e-mail, or fax it to the Wyoming Livestock Board within 30 days.
 2. Determine the severity and magnitude of the case in consultation with the reporting veterinarian and determine whether regulatory action is necessary.
 3. If not necessary, the State Veterinarian will advise the reporting veterinarian on how to proceed with the case.
 4. If regulatory action is prudent and necessary, the State Veterinarian will direct a WLSB Staff Veterinarian to coordinate with the livestock owner and the reporting veterinarian to assess the case situation and report back to the State Veterinarian.
 5. If deemed necessary by the investigating WLSB Staff Veterinarian, a quarantine will be issued and response protocol will be developed cooperatively between State Veterinarian, WLSB Staff Veterinarian, reporting veterinarian, and animal owner.
 6. If deemed necessary by investigating WLSB Staff Veterinarian and State Veterinarian, education and information efforts will be undertaken for producer, industry, and public.
