

Who we are What we do

Our Team

The animal health team includes the state veterinarian, assistant state veterinarians, animal health specialists, and administrative staff.

Animal Movement

Our team receives and reviews health certificates for animal imports. We also manage commuter and adjacent state permits.

Disease Management and Control

Our primary focus is the prevention and control of infectious diseases of domestic animals. This includes disease surveillance, mitigation plans, and outbreak response.

Rules and Regulations

To protect Wyoming livestock, WLSB maintains and enforces rules in our state and collaborates with veterinarians, livestock markets, feedlots, and producers.

Outreach

Our team provides educational outreach and training for producers, veterinarians, and the public on animal health issues in Wyoming.

WYOMING LIVESTOCK BOARD

ANIMAL HEALTH

***“To represent and serve
Wyoming’s livestock industry
through protecting livestock health
and verifying livestock ownership”***

State Animal Health Programs

- Brucellosis surveillance and control
- Species improvement programs including the National Poultry Improvement Plan and U.S. Swine Health Improvement Plan
- Secure food supply plans
- Infectious disease reporting of domestic animals

Collaborations with USDA

United States Department of Agriculture (USDA) veterinarians and staff work closely with WLSB towards disease program goals. USDA programs include scrapie eradication, bovine tuberculosis, brucellosis mitigation, and emergency preparedness and response.

Interested in updates from WLSB?

WLSB Animal Health sends e-mail updates on animal disease events, rule changes, producer meetings, and educational opportunities.
