Biosecurity Checklist

1. Security

- ☐ Designate areas that are restricted to exhibitor vehicle and foot traffic
- ☐ Determine security needs at the facility - during and after-hours
- ☐ Develop a protocol for reporting suspicious behavior and notifying exhibitors
- ☐ Maintain supplies that can be used for restricting areas (signage, cones)

2. Traffic

- ☐ Designate parking areas for exhibitors, workers, and public
- ☐ Use signage to direct traffic flow for unloading and loading animals
- ☐ Designate check in, vet-check, and weigh-in areas and clearly mark them
- ☐ Mark entrances and exits to warm up and show areas

3. General Biosecurity

- ☐ Assign a knowledgeable Biosecurity Team
- ☐ Designate an Animal Health Team for animal health monitoring
- ☐ Consult with state animal health officials about biosecurity and disease outbreak response
- ☐ Train staff on biosecurity plan and who to contact in an emergency

4. Animal Health Requirements

- ☐ Set Certificate of Veterinary Inspection (CVI) requirements prior to entry
- ☐ Develop and notify exhibitors of the vet-check and sick animal policy
- ☐ Develop a notification system for exhibitors to report sick animals
- ☐ Schedule the Animal Health Team to ensure regular animal monitoring, and report high morbidity or mortality events immediately to the Wyoming State Veterinarian

5. Isolation Procedures

- ☐ Develop protocols for the isolation area including animal care and cleaning
- ☐ Provide dedicated equipment and supplies
- ☐ Post signage to keep the public out of biosecure areas
- ☐ Setup and maintain cleaning stations at the entrance and exit

6. Feed Safety

- ☐ Develop general rules to be distributed to exhibitors for feed storage
- ☐ Notify exhibitors to immediately clean up feed spills

7. Cleaning and Disinfection

- ☐ Develop rules for exhibitors on cleaning practices for animal areas
- ☐ Provide cleaning supplies, approved disinfectants, and PPE and store in a designated area
- ☐ Develop a general protocol for cleaning and disinfecting contaminated areas during and after the event

8. Waste Management

- ☐ Designate a waste storage area (manure, bedding, feed) away from water sources and manage any run-off
- ☐ Create signage and a barrier for the waste area to keep people, dogs, cats, and wildlife away from infected waste

9. Pest Management

- ☐ Coordinate with pest control company to manage areas prone to pests
- ☐ Coordinate with facility grounds/maintenance staff to address vegetation management
- ☐ Notify exhibitors to promptly dispose of waste and feed in designated areas

10. Facility Map

- ☐ Create a print out map of the facility with entrances, exits, buildings, pens, feed storage, waste storage, milking areas, wash racks, cleaning supplies area, and the isolation area clearly marked
- ☐ Denote the check in area, vet check area, warm up rings, and weigh in areas
